

ELITE Product Information Sheet

ELITE is a powerful electronic learning portal developed using leading market technologies. E-Learning Portal offers educational institutions a high-performance, scalable, collaborative, and easy to use tools for students, observers (normally students' parents), and staff.

ELITE is a parents' portal which is a fully bespoke application providing an online environment where parents can engage in their child's education and communicate effectively with their school. **ELITE** will take your school into the next generation.

The solution suits different scales of educational institutions covering small, mid-sized, and large-scaled institutions. The solution provides business value and help for schools, colleges, and universities.

Many parents feel disassociated from schools and their child's education. It's important to have regular and consistent communication between all parties. **ELITE** bridges this gap without eliminating other forms of communication. **ELITE** supplies parents with an accurate view of their child, both positive and negative. Providing the ability to see appropriate data, parents are fully equipped to offer their child assistance where it's required. Hopefully this will help the child to excel further with their education.

ELITE consists of three highly integrated applications covering all communication channels between the educational institutions and its audience. The portal provides the dynamic Website engine for the entity displaying its general information, core methods, and its values. It also provides the Staff Portal which furnishes the collaboration and communication layer between staff members within the institute, and finally the Students portal which provides the electronic communication between students, observers, and the school towards the

ELITE

A highly scalable collaboration suite for the education sector.

Website

Provides a dynamically and highly customizable information presentation interface for the institution on the internet.

Staff Portal

Provides a collaborative layer between all staff members within the institution.

Students Portal

Provides the communication layer between students, observers, and instructors over the assignments, performance, activities, and operations related to the institution.

development of the students, their progress, assignments, and so on

Furthermore, **ELITE** provides a powerful integration gateway through which it can be easily integrated with back-end systems available at the institution such as School Management System, E-Exam, or Billing System. The solution provides dynamically built communication methods providing the mechanism for such operations to take place.

ELITE Product Features

- ◆ Highly visual and easy to use interface.
- ◆ Provides an Integration Gateway to integrate with existing applications (Registration Management Systems, e-Exam, Billing Systems, ...).
- ◆ Built on top of Microsoft Office SharePoint (MOSS) 2007.
- ◆ Utilizes Microsoft Learning Gateway (MLG) as the basis for the learning engine.
- ◆ Utilizes SharePoint Learning Kit (SLK).
- ◆ Supports SCORM objects for learning content.
- ◆ Built on Content Management System (CMS) architecture allowing business user to edit the content within the website.
- ◆ Allows defining news items, events, and surveys dynamically on the website.
- ◆ Covers assignments workflow from initiation by instructor, response by student, review by observer, to correcting and publishing results by instructor.
